Arina Kunashko

Junior+ Frontend Developer

Barcelona, Spain | https://github.com/ArinaKunashko | kunashkoa@gmail.com
LinkedIn - https://www.linkedin.com/in/arina-kunashko/

I am a Frontend developer with a passion for creating projects in JavaScript using the Vue.js framework. My work is characterized by a creative approach and a focus on achieving tangible results. I am always ready to learn new technologies and take on professional challenges that contribute to my development and growth.

SKILLS

Technologies: JavaScript, TypeScript, Git, Docker, Firebase, HTML, CSS, Webpack

Frameworks / Libraries: Vue.js, VueX, Nuxt, React, Redux, Axios, day.js, Tailwind CSS, Material UI, Bootstrap, Bulma
Languages: English - Intermediate

WORK EXPERIENCE

STOCRM
January 2024 - Present
Frontend Developer
Responsibilities:
I am developing and implementing new CRM system functionality to improve user experience. I optimize and improve the existing functionality of the CRM system, providing increased productivity and usability. I actively interact with backend developers to integrate client solutions with the backend, and ensure reliable and efficient operation of the system. I design and implement user interfaces using pure CSS, providing cross-browser compatibility and adaptability. I work with Vue.js Option API for creating reactive components, improving the user experience and facilitating code support.

Deneb
October 2023 - January 2024
Frontend Developer
Responsibilities:
Project development, creating websites and landing pages from scratch using Vue.js and Nuxt.js for SEO optimization and performance improvement. Utilizing both Composition API and Options API in development. Interacting with Docker for container creation and management, ensuring easy deployment and scalability. Using Tailwind CSS and Tailwind UI for modern and professional project design. Collaborating with design and development teams for optimal functionality and visual appeal.
Achievements:
Significant contribution to the company's success by creating modern, intuitive, and attractive web projects that increase conversion and customer satisfaction.

Diginetica
March 2023 - October 2023 (8 months)
Frontend Developer
Responsibilities:
Integrated the AnyQuery product using Vue.js, describing JS functions to gather necessary data on client websites, handling API requests, and testing product integration. Conducted code reviews and participated in product widget styling using Saas technologies. Integrated the Dolyame product using Vue.js and contributed to its development. Conducted interviews for the Frontend Developer position in the company.
Achievements:
Actively contributed to minimizing costs in product implementation, resulting in reduced expenses and accelerated integration processes.

OTHER

Volunteer work at Women in Tech, promoting inclusivity, diversity, and equality in science, technology, engineering, and mathematics (STEM).

EDUCATION

St. Petersburg State University (2021)
Faculty of Dentistry and Medical Technologies
Udemy: Vue - The Complete Guide (incl. Router & Composition API) (2023), React JS - Complete Guide for Frontend Web Development (2023), Nuxt.js 2 - Vue.js on Steroids (2023).
LinkedIn Learning: Learning Nuxt.js, DevOps Foundations: Continuous Delivery/Continuous Integration, Docker for Developers, Learning Jenkins.
